Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 May 2002.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

This application is a 371 of PCT/EP00/06234 filed on 07/03/2000. Acknowledgement is made of amendments entered on 6/5/2002. Claims 10-25 are pending. No claim is allowed at the present time.

Claim Rejections - 35 USC § 103

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the

applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 10-25 rejected under 35 U.S.C. 103(a) as being unpatentable over US 5693591 and US 5885932. See both documents in their entirety, especially the abstracts, examples, and all claims.

Presently claimed invention is drawn to a composition useful for the breaking of rest in deciduous fruit species comprising an organic nitrogen-containing compound selected from the group consisting of ethylenediamine, ethylenediamines, etc.

US '591 discloses activity promoting additives for rest-breaking agents. The activity promoting additives enhance the activity of rest-breaking agents thereby leading to improvements in the yields and quality of fruit from deciduous fruit trees.

US '932 and US '591 are very much alike; the only difference is that US '932 teaches activity leading to improvements in the yields and quality of fruit from **non**-deciduous fruit trees.

Instant claims differ from prior art in that neither reference discloses the groups stated in Claim 10. However, US '591 discloses, "Typical compounds suitable for use in the process of the present invention include, but are not limited to..." This means that the composition *comprises* the groups listed in the patent and could include the groups listed in the presently claimed invention. (See lines 53-54 in Column 4).

It would have been obvious to one skilled in the art at the time of invention to create a composition useful for breaking the rest in deciduous fruit species containing an organic nitrogen-containing compound because US '591 teaches rest-breaking compositions that improve in the yields and quality of fruit from deciduous fruit trees. Since Applicant's Claim 10 is very similar to US '591's Claim 10, one who is familiar with the art would be motivated to prepare a rest-breaking composition to improve the yields and quality of fruit from deciduous fruit trees. The motivation to combine the teachings of the prior art *Supra* would have been obvious at the time of invention.

In the light of the forgoing discussion, the Examiner's ultimate legal conclusion is that the subject matter defined by the instant claims would have been obvious within the meaning of 35 U.S.C. 103(a).
